**Notice of PCR Test Results - All “Negative”**

Dear parents and guardians,

Regarding the test results from the players at the prefectural volleyball tournament, the day before yesterday, four women’s volleyball students were confirmed to be positive for COVID-19. As a result, the public health center investigated close contact candidates and a couple of our students did a PCR test yesterday as a precaution and they were all “negative” for COVID-19.

The public health center said that there are no more close contact candidates, but we will continue to take thorough infection prevention measures such as but not limited to monitoring faculty and student’s temperature in both the morning and evening, and disinfecting school facilities.

Please continue to take basic preventive measures at home as well such as washing your hands and wearing a face mask.
